

Ubiquiti Extended Producer Responsibility Compliance Statement

WEEE Directive 2012/19/EU + Battery Directive 2006/66/EC

Electrical and electronic equipment (EEE) and batteries contain materials, components and substances that may be hazardous and present a risk to human health and the environment when waste electrical and electronic equipment (WEEE) and batteries are not handled correctly.

EEE and batteries are marked with the crossed-out wheellie bin symbol indicating that electrical and electronic equipment and batteries should not be disposed of in the regular household waste stream, but need to be collected separately. In case batteries contain more than 0,0005% mercury (Hg), 0,002% cadmium (Cd) or 0,004% lead (Pb) (by weight), the corresponding chemical symbol is displayed on the battery.

Users need to follow local recycling regulations to reduce adverse environmental impact in connection with disposal of WEEE and batteries and to increase opportunities for reuse, recycling, and recovery of WEEE and batteries. To facilitate this, free collection points are available in your area. Users are responsible for removing personal data from electronic devices prior to disposal. If possible please remove old batteries or accumulators from the electronic device before you return it for recycling.

WEEE*:

Batteries:

*The bar below the bin represents that a product was made after the 13th of August 2005. Ubiquiti includes the MAC to represent this date, further information can be found [here](#).

Ubiquiti European Product Take-Back Statement

If local disposal options are not available in your area, please reach out to Ubiquiti directly at WEEE@ui.com. Ubiquiti will work with you to arrange for the recycling of the product.

Where obligated, Ubiquiti complies with WEEE, Battery, and Packaging registration requirements in the following European countries:

Austria
